

Prof. Hideo Ohno has been elected “Fellow of American Physical Society”

Prof. Hideo Ohno (Professor at the Research Institute of Electrical Communication, Director of the Center for Spintronics Integrated Systems, and PI, Professor at the WPI-AIMR) has been elected a “Fellow of the American Physical Society (APS)” for his outstanding research in materials and device physics, especially the observation of ferromagnetism in magnetically doped III-V semiconductors and their application to spintronics.
